💼 Employment History

Software Engineer at Nerdy Trust, Mexico City

2018 — November 2020

- Worked well independently and on a team to solve problems.
- Organized and prioritized work to complete assignments in a timely, efficient manner.

During my stay at the company I had the opportunity to participate in different projects, the most important: Was a redesign of a managed application. This project was built with EmberJS, JQuery and Bootstrap. Also, we created an application which was built with Django, Wagtail and Bootstrap. Also an application developed for a bank, which consists in carrying out an inventory of the Point of Sale Terminals and in turn seeing the services that are associated. This application was developed with JQuery and Bootstrap for the frontend and Java, Oracle SQL, Red Hat Jboss for backend using MVC pattern. The last one project was developed in collaboration with India and the United States. Which is responsible for creating and manipulating project situations oriented to the sale of food. This application was built with ReactJS.
